

**Penstemon arenarius E. Greene****NEVADA DUNE BEARDTONGUE****FAMILY:** Scrophulariaceae, the figwort family.**SYNONYMS:** *Penstemon maguirei***STATUS:****Heritage Program SENSITIVE LIST,** ranks: G2G3 S2S3

USFWS/ESA: species of concern. STATE OF NEVADA: none. BLM: Special Status Species. USFS: Humboldt-Toiyabe NF Sensitive Species. NNNPS: watch list.

**POPULATION CENSUS:** 13 occurrences mapped at 1.0 km (0.6 mi) separation, OR 32 occurrences mapped at 0.16 km (0.1 mi) separation; total estimated individuals 1398+, total estimated area 224+ ha (554+ ac). **TREND:** unknown.**IMPACTS AND MAJOR THREATS:** No summary available (see references).**INVENTORY EFFORT:** Most recent entered survey 1988, average year of last survey 1982.

Years since last entered survey (percent of mapped records at various survey ages): 11-20 yrs: 90.6%; 21-30 yrs: 6.3%; 31-50 yrs: 3.1%.

**LAND MANAGEMENT** in decreasing predominance: U. S. Bureau of Land Management, private lands, U. S. Department of Defense (?).**RANGE:** Churchill, Mineral, and Nye counties, Nevada. **Nevada endemic.** Maximum range dimension 285.3 km (177.3 mi) excluding most disjunct record. **Type specimen** collected in Mineral County.**ELEVATIONS RECORDED:** 3920-5960 feet (1195-1817 meters).**HABITAT:** Deep loose sandy soils of valley bottoms, aeolian deposits, and dune skirts, often in alkaline areas, sometimes on road banks and other recovering disturbances crossing such soils, in the shadscale zone with *Psorothamnus polydenius*, *Achnatherum hymenoides*, *Astragalus geyeri* var. *geyeri*, *Atriplex canescens*, *A. confertifolia*, *Tetradymia glabrata*, *Gilia leptomeria*, *Tiquilia nuttallii*, *Sarcobatus baileyi*, *Chrysothamnus*, *Ephedra nevadensis*, etc. Dependent on sand dunes or deep sand.**PHENOLOGY:** flowering late-spring. Range of most frequent survey months: May-June.**LIFE-FORM AND HABIT:** perennial herb from a buried root crown.**DESCRIPTION:** A perennial herb, 1-3 dm tall, with leathery, coarsely toothed leaves and whitish to purple, funnel-shaped flowers striped with magenta. Blooms from May to July.**PHOTOGRAPHS:** Weixelman and Atwood (1990); Nevada Natural Heritage Program images web page (1998-present) and files.**ILLUSTRATIONS:** Cronquist et al. (1984), Mozingo and Williams (1980), Weixelman and Atwood (1990).**OTHER GENERAL REFERENCES** (listed separately): Beatley (1976), Beatley (1977).**SPECIFIC REFERENCES:**Goodrich, S. 1979. Status report on *Penstemon arenarius*. Portland, Oregon: U. S. Fish and Wildlife Service.

# NEVADA RARE PLANT ATLAS

## INDEX TO MAPS AND FACT SHEETS

(8 August 2001)

This index lists all plant taxa on the Nevada Natural Heritage Program's at-risk and watch lists, whether or not included in the current Nevada Rare Plant Atlas. Atlas fact sheets and maps are available and linked for over 80% of these taxa. PLEASE NOTE THAT INFORMATION FOR SOME SPECIES MAY BE INCOMPLETE OR OUT OF DATE. Please read the atlas text sections for further information on the sources and limitations of the data represented on the maps and fact sheets, and for general references cited only in brief in the fact sheets. Fact sheets are saved in PDF format and require the free Adobe® Acrobat® Reader plug-in if not already installed on your system. Images, when available as links from our images page, are indicated with a link to that page, following which you must scroll manually to the species of interest. Updated maps and fact sheets will be generated and posted as time and resources permit, as the data comprising them are constantly being generated and updated.

**Map Printing and Display:** Due to storage limitations, the map images linked to this web page are **not** reproduced at their original printed resolution (600 dpi in 8.5x11 inch format). They are instead produced at 105 dpi (dots-per-inch) resolution, which results in grainy but acceptably readable output when printed or displayed. When you click on a map link, the first image that displays is formatted for best printing results, even though the screen display may appear degraded. To best approximate an original printed version: change the page set-up or format in your browser to eliminate all headers and footers and change all margins to their smallest possible value, then print pages 1 to 1 of this version. Recent versions of MS Internet Explorer or Netscape browsers printing to laserjet printers should work well. If you wish to view the map in its **best display quality on your screen**, simply click anywhere in the first map image and you will receive a second image at maximum available resolution.

	<u>Scientific Name</u>	<u>Common Name</u>	<u>Family</u>
<u>image</u>	<i>Abronia nana</i> ssp. <i>covillei</i>	Coville abronia	Nyctaginaceae
	<i>Agastache cusickii</i>	Cusick hyssop	Lamiaceae
